Job Description

As a Process Improvement Specialist you will,

- Lead process improvement projects across Sales Operations and Account Management
- Analyse current processes and identify process insufficiencies, redundancies in existing process and make it efficient utilizing our current systems
- Reduce manual activity/interventions and make the process lean and efficient
- Identify new process improvement projects, agree and deliver them on time
- Initiate and execute improvement projects, working closely with internal stakeholders to drive change and enhance operational efficiency;
- Ensure all process improvements still meet the requirements of audit and SOX control

To be successful as a Process Improvement Specialist you need,

- Experience leading process improvement projects
- Excellent communicator
- Has experience working across/with multiple stakeholders across the company
- Experience working in manufacturing/product industry is an added advantage

Your new company

Hitachi Construction Machinery is a world leading manufacturer of construction and mining equipment with a strong focus on a consistent development to provide customers with the technology, products and services that generate new value. Its employees represent a group of trusted experts while keeping continued focus on innovation and growth. Are you an independent achiever focused on the performance that is looking to join a multi-cultural, collaborative and an innovative working environment? If so, then we are looking for you!
