Job Description

We are currently looking for a new colleague to join the position of **Supplier Development Engineer** at Hitachi Construction Machinery Europe site in Amsterdam, Netherlands.

Department: Procurement

Experience: 2 years in similar role

Working hours: Full-time

Languages: native/fluent English, nice to have Dutch

The goal of this job is the development of HCME's suppliers in order to meet the organization's requirements to Safety, Quality, Delivery, Cost and Environment (SQDCE).

What you will be doing

- Managing & controlling of Technical drawings and revisions at supplier site
- Reviewing tooling concepts and management of tooling at supplier site
- Conducting audits at supplier
- Creating development plans in line with Procurement and Category strategies
- Analyzing industries, innovations of supply markets and technological best practices and trends
- Managing improvement projects
- Developing suppliers to meet the company's goals regarding SQDCE
- Supporting the selection of potential suppliers
- Developing, monitoring and improving processes at the supplier in line with Hitachi standards
- Supplier risk management
- Performing supplier relation management
- Reviewing tooling concepts and management of tooling at supplier site
- Developing and maintaining supplier manual
- Representing HCME towards internal & external suppliers

What you will need to succeed

- Vocational level of education, preferable in the Engineering field
- Min. 2 years of experience in a similar area
- Familiarity with 8D Problem Solving process, FMEA, PPAP and technical drawings reading
- Ability to coordinate and implement Process improvement at suppliers in the areas of SQDCE
- Good knowledge of the English language (spoken and written)
- Previous auditing experience is preferred
- Good commercial communication and presentation skills
- Analytical and results-driven mindset
- Team player

Your new company
